1. Upgrade Preparation

Thank you for purchasing the FA-91ALC and FA-91LG options for the FA-9100 or FA-9100RPS. This upgrade guide is for the users who purchased one of both options after installing the other of them. After upgrading the card, FA-91ALC and FA-91LG can be used by switching between them.

1-1. Materials Required

◆ **CD-ROM supplied with FA-91ALC or FA-91LG**

Contents on CD-ROM:

FA-91LG GUI (application)

FA-91LG GUI Operation Manual

FA-91ALC/FA-91LG Upgrade Guide for Additional Installation (this document)

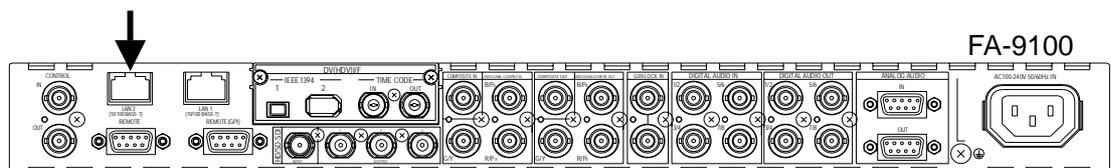

◆ **Computer and lan cable**

Computer: A computer with FA-91LG GUI (application) installed.

LAN cable: For connecting the FA-9100 or FA-9100RPS to a computer.

1-2. Ethernet Port on FA-9100 or FA-9100RPS

For connecting the FA-9100 or FA-9100RPS, please use the LAN2 port. The FA-9100 or FA-9100RPS recognizes the LAN2 port as ALC PORT when using FA-91ALC, and recognizes as LOGO PORT when using FA-91LG.

2. Additional Installation

The following workflow shows the steps necessary for additional installation of FA-91ALC or FA-91LG.

Installing FA-91LG GUI (see 2-1)

Connecting FA-9100 or FA-9100RPS to a computer (see 2-2)

Obtaining a serial number (see 2-3)

Telling us your serial number

Obtaining a pass code

Connecting FA-9100 or FA-9100RPS to a computer (see 2-2)

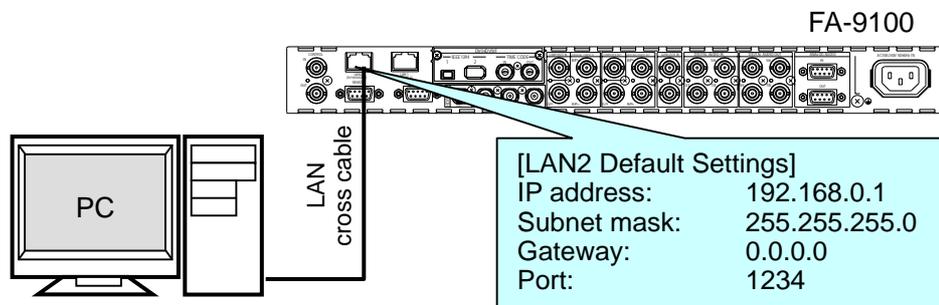

Entering the issued pass code and enabling FA-91ALC or FA-91LG (see 2-4)

2-1. Installing FA-91LG GUI

If you are already using FA-91ALC, see FA-91LG GUI Operation Manual on the CD-ROM and install FA-91LG GUI (application) to your computer.

2-2. Connecting FA-9100 or FA-9100RPS to Computer

Connect the computer with FA-91LG GUI installed to the LAN2 port of the FA-9100 or FA-9100RPS. The example below shows how to connect a computer to the FA-9100 directly.

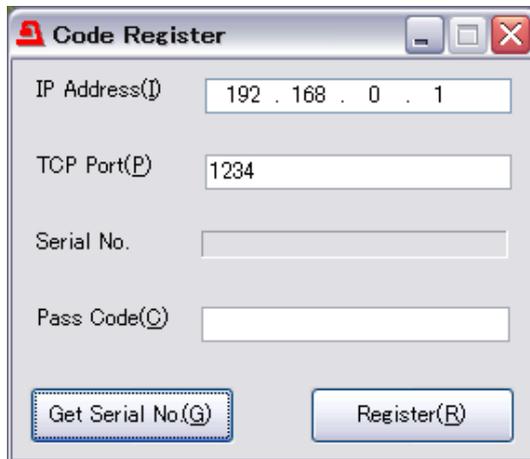

NOTE

See FA-91LG GUI Operation Manual for details.

2-3. Obtaining a Serial Number

- (1) Go to **Start > All Programs > FOR-A > FA-91LG > Code Register** to start the software for adding options (Code Register).
- (2) Enter the current IP address of the LAN2 port on the FA-9100 or FA-9100RPS. If you changed the port number, enter the current port number. The factory default setting is as shown in the figure below.

The screenshot shows a window titled "Code Register" with the following fields and buttons:

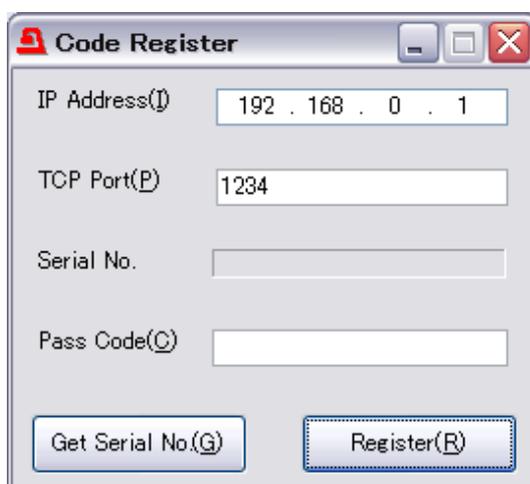

- IP Address(I): 192 . 168 . 0 . 1
- TCP Port(P): 1234
- Serial No.:
- Pass Code(C):
- Buttons: Get Serial No.(G) (highlighted), Register(R)

- (3) Click the **Get Serial No.** button. The serial number for your FA-91ALC or FA-91LG is displayed in **Serial No.**.

After obtaining a serial number, please let us know your serial number. At a later date, we will issue a pass code for registering the product. After obtaining the pass code, please follow the instructions below.

2-4. Enabling FA-91ALC or FA-91LG

- (1) Go to **Start > All Programs > FOR-A > FA-91LG > Code Register** to start the software for adding options (Code Register).
- (2) Enter the current IP address of the LAN2 port on the FA-9100 or FA-9100RPS. If you changed the port number, enter the current port number.

The screenshot shows a window titled "Code Register" with the following fields and buttons:

- IP Address(I): 192 . 168 . 0 . 1
- TCP Port(P): 1234
- Serial No.:
- Pass Code(C):
- Buttons: Get Serial No.(G), Register(R) (highlighted)

- (3) Enter the issued pass code in **Pass Code**.
- (4) Click the **Register** button.
- (5) If "OK" is displayed, the registration is complete. Click the button in the upper right corner to close the application.
- (6) Reboot the FA-9100 or FA-9100RPS. After rebooting, FA-91ALC or FA-91LG is ready for operation.

IMPORTANT

Note that FA-91ALC and FA-91LG cannot be used at the same time. Please select either one in the LG/ALC SELECT menu. (See "Selecting LG or ALC" in FA-9100/RPS Operation Manual for details.)

If an error message appears:

Check the network connections (lan cable) and network settings (IP address and port number) and try again. The pass code differs from every other serial number of the FA-91ALC or FA-91LG. Please check the serial number again.
