

# THUNDERBOLT™ 2 EXPANSION CARD HVS-100TB2

Thunderbolt™ 2 I/O expansion card for HVS-100/HVS-2000 switchers, enabling single-cable transfer of four channels of HD video to a computer.

## GearLink™ compatible

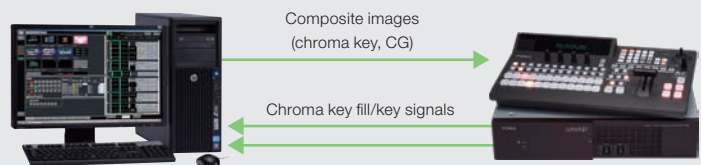

Control a switcher over a single cable.  
 Can also capture video in the switcher memory.

## Convenient for virtual systems

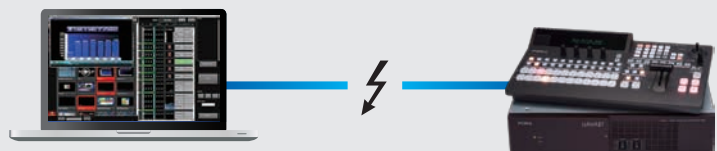

### Until now

Three SDI cables are needed to connect a switcher to a computer with an SDI I/O graphics card.

### Using HVS-100TB2

Use a single cable to connect an ordinary Thunderbolt™ 2-compatible computer used as a virtual studio and send graphics for layout.

HVS-100			
Slot name	A	B	C
Maximum number of installable cards	1	1	1
Number of inputs and outputs	4 inputs per card	2 inputs and 2 outputs per card	2 outputs per card

HVS-2000		
Slot name	IN A to D	I/O A, B
Maximum number of installable cards	4	2
Number of inputs and outputs	4 inputs per card	2 inputs and 2 outputs per card
